ARGAN OIL

ITEM DESCRIPTION
Argan oil not torrefied an oil obtained by cold extraction without odor. It is not refined what enables it to preserve its dietetic organoleptic natural qualities. It is rich in Omega 6 and vitamin E.
The oil of argan fight naturally and effectively against aging and the body drynesses.
Argan oil is applied to soften and protect the skin and to nourish the hair.
It is also used in traditional medicine, in particular to look after or prevent certain skin diseases.
Birth at the adulthood, it is omnipresent in the life of the Berber ones, which use it:
- at the infants and the babies to carry out the body massages,
- to contribute to the cicatrization of the buttons of chicken pox,
- in the treatments of the acne of the teenagers,
- at the pregnant woman which coats the belly to soften the skin and to avoid the appearance of the stretch marks,
- at the adulthood, for the people suffering from rheumatisms which carry out massages of their articulations (the Berber ones say that this oil makes it possible "to heat" the articulations)….

DIRECTIONS FOR USE
How to use argan oil on the hair?
To give force and vitality to the weakened hair, apply the oil of argan one hour before the shampoo to the whole of the hair, then wash and rinse
How used the natural argan oil to the skin?
To apply the oil of argan to the body preferably a little wet, to gently mass by circular motions in order to make it penetrate delicately on the skin.
To apply the oil of argan to the face respect the shape of the face, for example for the face to make a light movement from left to right and not circular, for the cheeks leave the blow then go up as if you want to catch up with natural depression. The cosmetic oil of argan can replace the cream of night.
